PROFILE

Software Engineer specializing in React Native and modern web technologies with hands-on experience delivering production-ready mobile applications, admin portals, and API-driven systems. Experienced in building multilingual applications, CMS platforms, authentication workflows, real-time integrations, and reusable UI architectures using React Native, React, TypeScript, Firebase, Supabase, and Node.js.

PROFESSIONAL EXPERIENCE

React Native Developer – Fidsor.net

Feb 2026 – Aug 2026

- Developed and maintained production-ready cross-platform mobile applications using React Native, TypeScript, Firebase, and REST APIs, implementing 10+ core features including secure authentication and real-time data synchronization.
- Contributed to the KAPL Cultural Library mobile app, implementing Nafath national ID verification, multilingual RTL/LTR support, encrypted session management, and role-based access control.
- Built the Alvora Admin Portal (React 19, TypeScript, Vite, Material UI) for managing 15+ CMS modules including projects, blogs, careers, certificates, and inquiries.
- Designed reusable UI components — dynamic forms, a server-side paginated DataGrid, file upload modules, and protected authentication flows — reducing feature development time by approximately 30%.
- Integrated Supabase-backed APIs provided by the backend team and collaborated closely with backend engineers to ship scalable, secure, maintainable features, including barcode scanning and image upload utilities.

PROJECTS

KAPL Cultural Library Mobile Application

Production-ready mobile application built using React Native (TypeScript), Firebase, and REST APIs, featuring Nafath national ID verification, multilingual RTL/LTR support, secure authentication, role-based access, digital library services, event management, and a dynamic CMS-driven content system across 10+ screens.

Alvora Admin Portal

Enterprise CMS platform developed using React 19, TypeScript, Vite, and Material UI to manage projects, blogs, careers, certificates, inquiries, and 15+ additional content modules, with JWT-based authentication, protected/guarded routing, and a reusable component library (paginated DataGrid, dynamic forms, image upload, rich-text editing, and Recharts dashboard analytics).

Decentralized Task Management — Web3 Application

- Developed a Web3, blockchain-integrated task management app using React.js, Solidity, and Ethereum, with a smart contract handling 5+ functions for tamper-proof task tracking.

Virtual School — Learning Platform

- Built a Flutter-based learning platform with role-based access covering 3 user types, delivering real-time course, assignment, and data management via Firebase.

Gold Trade Tracker — Trading & Reporting App

- Engineered a full-stack Gold Trade Tracker using React Native and Firebase, implementing 5+ core screens for multi-user accounts, automated currency conversion, real-time profit/loss calculations, and sale/purchase reporting.

SKILLS

Frontend: React Native, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Material UI, Tailwind CSS, Expo

Backend: Node.js, Express.js, Firebase, Supabase, MongoDB, PostgreSQL, REST APIs

AI / ML: Python, RAG Systems, LLM Integration, AI API Integration

Tools: Git, GitHub, Android Studio, VS Code, Postman, Swagger, EAS Build, Firebase Console

EDUCATION

Bachelor's in Computer Science

Capital University of Science & Technology | Mar 2022 – Expected Feb 2026

CERTIFICATIONS

React/React Native, JavaScript – freeCodeCamp | Flutter, LLM Mastery & Generative AI – Udemy
